

Hatice Dilmaç

Electrical and Electronics Engineer

Summary

I am Hatice, a passionate electronics engineer. Currently, as a final-year Electrical and Electronics Engineering student, I am continuously developing myself and open to gaining new experiences. At the same time, I aim to improve myself in web design and software, as well as in embedded systems, which align with my interests. With my excitement and passion for self-improvement, I am someone who is inclined toward teamwork. I look forward to being part of developing new technologies together...
